Data Scientist & AI Engineer

I am a data-driven AI developer specializing in Data Science and MLOps. My expertise includes building machine learning models, working with NLP and time series analysis, and deploying models using scalable MLOps workflows. I develop backend systems using Django, Flask, and FastAPI, and design desktop applications with PyQt5. I also create impactful data visualizations using SQL, Power BI, and Tableau. With hands-on experience in web scraping, automation, model deployment, and end-to-end data pipeline management, I am passionate about turning data into actionable insights. I focus on building intelligent, efficient, and future-proof AI systems. I continuously improve my skills to deliver next-generation solutions and drive innovation through data and automation.

Experience

08.2023-10.2023 Pysertech l Gebze/Kocaeli
Intern Python Developer
I assisted in the development of a ticket system using the Python Django library.

2023 BirfenElektirik&Elektronik l Taşköprü/Çiftlikköy/Yalova
Intern Ros Developer
I completed an internship on the ROS2 (Robot Operating System 2) platform. I developed and tested ROS2 packages using Python and C++ programming languages.

2022 UyumsoftBilgiSistemleriveTeknolojileri Ticaret A.Ş
Intern Python Developer
I developed some facilitating modules using REST API for the web management interface called "Horizon". Horizon is built with the Python Django library and is used to access the OpenStack cloud system through a web interface.
